# Chapter 1

# random lists

## 1.1 Introduction

link to algorithms book here is some text under the link

```
this is a test python file with a test print
```

here is more text under the link

#### Master Method

- chapter 4 in book
- $f(n) = \Omega n$
- ullet another item
- hello there

#### Analysis of Quicksort

- worst case vs average case
- $\bullet$  chapter 7

#### Partitioning Schemes

- quick selection
- $\bullet$  median of median
- chapter 9

## 1.2 testing

lets see if this will work this is a test to see if updates work

```
#!/usr/bin/python

def test():
    print 'this_is_a_test_python_file_with_a_test_print'
test();
```

another line here there should be two lines between block listings

```
this is a test python file with a test print
```

### 1.3 Number Two Test

here is some text before the number two file
